

Skype Call Recorder for Mac

Record it now. Listen to it later. Save it forever.

SkypeCap for Mac captures and records audio calls made from Skype. Recorded calls are saved as MP4 files, to be replayed, shared, archived, or studied. SkypeCap is valuable for business, a practical tool for everyday and very easy to use. Get a free trial version of SkypeCap today.

Wouldn't you love to stop time and take a minute to catch up? It's nearly impossible to take notes during a call session and keep up with the conversation. Stay in the conversation and keep the discussion moving when the Skype call is recorded with SkypeCap.

Do you wish you could be in two places at once? With Skypecap call recorder software you can make that 3pm sales call in person and not miss a word of the 3pm conference call. When the Skype conference call is recorded and saved with SkypeCap, you simply listen to the recorded call later, when it's convenient for you.

Skype calls recorded with SkypeCap can be referenced again and again. Calls are saved in an MP4 format: compact and versatile. Use the saved calls to hone your phone presentation skills. A saved conference call can be distributed to anyone who missed the original call. Sales calls and interviews can be saved and more carefully reviewed later.

SkypeCap records your audio Skype calls for you. It's so easy now to record your call, listen to it later, and save it forever. Download SkypeCap today.

SkypeCap is a valuable business tool.

- Record important conference calls.
